

8/7/03

H 2000-102-30/31

Donny Olson interviewed at Renter's headquarters here
in home. Donny talks about his family's

history w/ residential building and
how he got into helicopter building.
The description of building w/ helicopters
are quite detailed.

He talks about
how building w/ helicopters got
started, the economics of such
building and the role in
the modern economy - noting
connection of helicopters w/
velvet industry and time of year
when velvet is harvested.

Donny's home is in Galovin and
he likes to be home at night
so we were lucky to catch him,
particularly given his political
commitments. He is a doctor, studied
law, and is a pilot.

- Family history of herding
- Present involvement
- Evolution of Technology in herding & impact on herding
- Weather - Snowfall / timing
- ~~Range of management~~ Economics of herding & how it affects management strategies.
